Welcome to Mineral Industry Days

We are pleased to welcome you to Mineral Industry Days – a gathering point for industry professionals from across Europe and beyond. In a time marked by geopolitical tension, climate urgency, and a growing demand for a secure and responsible resource supply, this conference presents a crucial conversation about the role of Europe's mineral industry in shaping a sustainable and resilient future.

With the theme “Sustainability and Preparedness”, we explore how the extractive sector – including both minerals and aggregates – contributes to Europe's security, economic stability, and green transition. What does resilience mean for our industry in today's world? How can sustainability not only coexist with preparedness, but strengthen it?

Over two days of dialogue, knowledge-sharing, and debate, we will highlight best practices, challenges and policy developments – from local operations to global supply chains. We are also delighted to invite you to our conference dinner, an opportunity to connect in a more informal setting and celebrate the strength and diversity of our shared European industry.

**Welcome to Mineral Industry Days
– and to meaningful conversations that
move us forward, together.**

Short descriptions

Norsk Industri (The Federation of Norwegian Industries) is Norway's leading association, representing over 3,000 companies with more than 140,000 employees. The organization works to secure competitive and sustainable conditions for Norwegian industry and highlight its role in welfare and value creation. Members span sectors such as oil and gas, metals, chemicals, mineral industry, maritime, furniture, plastics, textiles, and recycling. The federation offers policy advocacy, legal support, advisory services, and access to courses, conferences, and beneficial agreements. **www.norskindustri.no**

Aggregates Europe represents the producers of sand, gravel, crushed rock, marine aggregates, recycled and manufactured aggregates, with Members in 26 countries. It is by far the largest non-energy extractive industry, covering a demand of 3 billion tonnes of aggregates per year, produced on 26,000 sites by 15,000 companies (mostly SMEs), and employing 187,000 people across Europe. **www.aggregates-europe.eu**

Euromines, the European Association of Mining, Metal Ores & Industrial Minerals, is the voice of the European metals and minerals mining industry. Our primary goal is to promote responsible industry practices and ensure that mining receives appropriate consideration in EU policymaking. As a collaborative network, Euromines brings together the Secretariat and Members to assess the impact of European and international policies on the industry, shaping unified positions and actions. Representing both large and small companies, as well as their subsidiaries across Europe and beyond, Euromines advocates for a sustainable and competitive mining sector. **www.euromines.org**
